## COMPETITIVE PREMEDICAL STUDIES PROGRAM

The Columbus State University Competitive Premedical Studies Program (CPSP) was created in 2013 to better prepare students for medical school and, ultimately, address the physician shortage in Georgia and nationwide. The program goals include the following: recruit motivated, academically-talented students interested in a career in medicine; provide unique resources designed to increase the number of competitive medical school applicants; foster CSU connections to the local medical community; and establish CSU as the preferred premedical studies university in Georgia.

## PRE-MED BY THE NUMBERS

# 54

The number of students enrolled in the program

# 47

The number of students who have been accepted to medical schools since 2018, including 7 in 2022 (1-2 students were accepted annually before the program's inception)

# 70

The percentage of enrolled students who are from the Columbus area

# \$ 62,050

The amount of money awarded to students in scholarships

# 88%

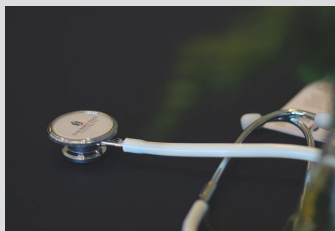

Average acceptance rate of CPSP students who apply to medical schools over the past 5 years.

# 3.79

The average GPA of students enrolled in the program

# 8

The number of U.S. medical schools students have been accepted to, including all of those in Georgia.

### PROGRAM RESOURCES:

- Volunteering opportunities in hospitals/clinics
- Affiliation agreements with three medical schools.
- Medical school connections
- Physician networking
- MCAT preparation
- Medical school application and interview preparation
