

Columbus State University Department of Chemistry proudly presents

Professionals in the field: Success as an Industrial Chemist

Alex Alvarez, BA Chemistry
Environmental Laboratory Chemist
Serco Inc./ USEPA Region 4 ESAT

Alex graduated in the Spring of 2023 from CSU and achieved a Bachelor of Arts in Biochemistry. During his career at CSU, he dedicated his time to full time employment to support himself as well as being an active member of the chemistry department through published research and teaching assistance.

Post graduation, Alex sought employment with the US Environmental Protection Agency in Athens, GA, which had been his goal since his 1st year of undergrad.

Alex began his career by working with the Environmental Services Assistance Team within the EPA where he currently focuses on gas cylinder verification with the Protocol Gas Verification Program, which he developed for the region. He also works on the organic extractions and analysis of semi-volatile organic compounds, pesticides and polychlorinated biphenyls.

Attend the presentation

Thursday, October 31
12:30—1:30 p.m.
Stanley Hall, Room 209B

Food will be provided.

The American Chemistry Society—student affiliate chapter is an official student chapter of the American Chemical Society (ACS).
